

## Create Tokens on MATRIX mainnet

Step 1: Obtain the byte code from the compiled contract

Step 2: Go into the "Contracts" module of MATRIX online wallet

Step 3: Paste the byte code into "Byte Code" box (Since there is a lot of data attached to contract transactions, gas limit should be set as large as possible):

Byte Code

```
1561155557600080fd5b601860008473ffffffffffffffffffffffffffffffff1673ffffffffffffffffffffffffffffffff16815260200190815260200160002054601860008673ffffffffffffffffffffffffffffffff1673ffffffffffffffffffffffffffffffff1681526020019081526020016000205401905081601860008673ffffffffffffffffffffffffffffffff1673ffffffffffffffffffffffffffffffff1681526020019081526020016000206000828254039250508190555081601860008573ffffffffffffffffffffffffffffffff1673ffffffffffffffffffffffffffffffff168152602001908152602001600020600082825401925050819055508273ffffffffffffffffffffffffffffffff168473ffffffffffffffffffffffffffffffff167fddf252ad1be2c89b69c2b068fc378daa952ba7f163c4a11628f55a4df523b3e846040518082815260200191505060405180910390a380601860008573ffffffffffffffffffffffffffffffff1673ffffffffffffffffffffffffffffffff16815260200190815260200160002054601860008773ffffffffffffffffffffffffffffffff1673ffffffffffffffffffffffffffffffff168152602001908152602001600020540114151561176257fe5b505050505060a165627a7a723058200b43066927d5e3c46ad00f93fdd67af0212a0f998b8d873a8d1683cb5bc80b20029
```

Gas Limit:

3000000

Step 4: Unlock your wallet and click "Sign Transaction" , then click "Deploy Contract"

Gas Limit

3000000

Sign Transaction

Raw Transaction

```
{"nonce": "0x1000000000000", "gasPrice": "0x0430e23400", "gasLimit": "0x2dc6c0", "value": "0x00", "data": "0x", "TxEnterType": "", "IsEntrustTx": "", "CommitTime": "1553592118", "extra_to": [[0, 0, []], "chainId": 3]}
```

Signed Transaction

```

```

Deploy Contract

Step 5: Please keep the returned contract address well

发送成功

Your TX has been broadcast to the network. This does not mean it has been mined & sent. During times of extreme volume, it may take 3+ hours to send. 1) Check your TX below. 2) If it is pending for hours or disappears, use the Check TX Status Page to replace. 3) Use [MAN Gas Station] to see what gas price is optimal. 4) Save your TX Hash in case you need it later:

0x15bab63acb0aead9237959bfb0bb86c5558-0f489-195ca8f7139-41d8d6d366

View your transaction & Contract Address **MAN.39mZaejH7jHUT3MTTrkjXCTmQS47**

Step 6: Go to the "New Wallet" and choose "Add token" . Then input

the contract address, token name and Decimals (default is 18). Click “Save” .

Step 7: In the Transfer page, you can select the newly created token.
